Your Community, Our Priority.

As President of the American Society of Civil Engineers, I often told the old story of the group of masons once working beside a road. A passing traveler who asked what they were doing received three different answers; one mason said he was stacking rocks, the next that he was building a wall, and finally one mason answered proudly that he was building a cathedral.

At Klotz Associates we're building for your community. Engineering design stacks rocks better, builds walls safer and harnesses technology to build the sustainable Infrastructure that is the cathedral of modern civilization.

Your community's tomorrow is our priority today. 

Solutions

Engineering Solutions

Your Goals, Our Mission. Klotz Associates exists to help you, our client, do your job better. Whether your job is building roadways or waterways, transit systems or drainage systems, Klotz Associates brings our proven approach to engineering solutions for your community.

Innovative by Design

Klotz Associates is improving efficiency through design that works. Whether improving safety or efficiency (or both), our inventive engineering solutions work with construction techniques, tried and true or new generation.

Proven Results

From your everyday puzzles to your thorniest challenges, Klotz Associates is practicing civil engineering for tomorrow, today. Not off-the-shelf, cookbook engineering, but the best, practical solutions, tailor-made for you.

Services

To build your community's infrastructure and economy Klotz Associates offers a wide-range of expertise

Water and Sewer | We find, clean, disinfect and deliver water to people's homes and businesses. When the public finishes with it, we pick it up, clean it up and recycle it as needed.

Stormwater | Our experts create drainage systems to prepare for extraordinary flood events.

Roadways | We ensure that roadway and traffic systems move the people and goods that move our economy.

Bridges | Klotz Associates designs safe and efficient bridges to cross streets, railroads or bodies of water.

Ports | Our collaborative approach prepares our country's ports to manage, modernize and expand their facilities.

Traffic & Transit | From road congestion to the latest transit technologies, we enhance traffic flow and mobility.

Airports | We help local economies thrive through well-designed airports – large or small.

Land Development | We design site improvements and neighborhoods that address the quality of life basics.

Sustainability

At Klotz Associates we're optimizing economic, social and environmental realities for the public good. We have re-imagined our processes and offer our clients opportunities for sustainable design – which can save money, too.

Through proper application of sustainable practices, we are able to meet the often competing goals of economic, social and environmental stakeholders. From recycled materials to the use of native materials and vegetation, we're reducing stormwater runoff and heat island impacts for our clients, their communities and their bottom-line.

To meet LEED, LID* or any sustainable criteria, Klotz Associates provides award-winning engineering designs while focusing on practical, workable solutions for our clients. We're identifying new ways to meet the needs of today without compromising the resources of tomorrow.

*LEED – Leadership in Energy and Environmental Design LID – Low Impact Development
