KLOTZ ASSOCIATES MARKS 25TH YEAR ANNIVERSARY

Houston - Klotz Associates was honored for providing “professional and innovative engineering services for the past 25 years” in Harris County and throughout the state of Texas in a proclamation issued last week. Klotz Associates was established in 1985 and has been building the systems that build our communities for the last quarter of a century.

“After reaching almost 10,000 project milestones for our clients, we've hit a milestone of our own, and it's our biggest yet”, said **D. Wayne Klotz, P.E., D.WRE, and president of Klotz Associates.** “We’re celebrating twenty-five years of engineering excellence and commitment to sustainable quality solutions for every project we undertake.”

Innovators Then...

Founded in 1985 by second- and third-generation Houstonians Bill and Wayne Klotz to deliver engineering and design services, Klotz Associates has prospered by building a client base of cities -big and small- along the Texas Gulf Coast. The new firm grew by continually providing practical civil engineering solutions for clients.

To make use of the latest in computing technology in 1985, Klotz Associates purchased three IBM PCs running MS-DOS with 64k memory and two 5-inch floppy disk drives each. Since computer aided design and drafting (CADD) and computerized geographical information systems (GIS) were still in the early – and highly expensive – stages of development, Klotz Associates continued to perform drafting and mapping manually until the technology improved and prices fell.

...and Innovators Now

With locations in Austin, Houston, Lufkin and San Antonio, the award-winning Klotz Associates is still providing the best engineering solutions to clients with cutting-edge technology results. By deploying the latest technology solutions – including servers virtualized to improve productivity, design stations with dual full high-definition (HD), high-resolution monitors and the latest GIS and CADD software options – Klotz Associates has attracted talent from throughout the region and become one of Texas' leading, home-grown engineering and design firms.

To commemorate this milestone, Klotz Associates hosted a reception Wednesday, June 16, 2010 to honor clients, associates and friends. The event was held at the new Texas inspired restaurant, Stella Sola, located in the historic Heights area of Houston.

Klotz Associates has been recognized by the ENR Top 500 List of best design firms in the nation and has twice been named to Zweig-White's Hottest List of fastest growing firms in the engineering, architectural and environmental consulting industry. With a staff of 130 professionals, the firm provides land development, transportation, traffic, ITS, water and sewer, aviation and drainage consulting engineering services. For more information call 281-589-7257 or visit www.klotz.com.
